

Solution Architect & Consultant – Identity and dWeb

The Company

Danube Tech is a global pioneer in the area of decentralized, self-sovereign identity (SSI). We are building products that enable a global infrastructure for digital identity and create the foundation for a new generation of fully distributed applications (“uApps”). Among our clients are diverse public and private sector organizations (B2B/G) around the globe and we are an industry leader for R&D, standardization and open source development.

Our team is still small, but we are expecting to grow significantly over the next years. Also, we are moving from a project-based to a product-based business model. To support these transitions, we are looking for a talented, driven and ambitious Solution Architect with a passion for technology consulting.

Your Role / Tasks

- Develop expertise in the field of self-sovereign identity (SSI), design and deliver novel digital identity solutions to our customers and partners;
- Drive consulting and software implementation projects for customers from diverse sectors and industries;
- Identify, understand and translate customer needs into effective business and technology solutions;
- Engage with the global SSI and open source community;
- Engage with software development / product teams and contribute to the design and architecture of our solutions;
- Contribute to our strategic planning in different areas (e.g. product, open source, business model, pricing, IPR);
- Create content for internal and external use (e.g. documentation for developers, memos for customers, blog posts, research papers)
- Contribute to the development of Proof-of-Concept implementations for showcasing architectural design decisions;
- Contribute to our R&D projects and support cutting-edge research to enable the development of novel products or to improve existing solutions;

Your Profile / Skills

- Passion for decentralization, innovative technologies and information systems;
- 2+ years of experience as solution architect or consultant in areas such as security, distributed systems, cryptographic protocols, blockchain or data management;
- Bachelor's degree, preferably in Computer Science, Software Engineering or a related field;
- Desire to take responsibility and to pro-actively approach and solve challenges;
- Growth mindset that drives you to learn new things, seek input from others and support teams working in different fields (strategy, product, software development, sales, marketing etc.)
- Critical mind with proven ability to solve complex problems by applying creative thinking and strong analytical skills;
- Ability to build, manage and foster a team-oriented environment;
- Excellent communication and interpersonal skills;
- Fluent or proficient English skills (written and oral);
- Familiar with cloud environments like Amazon AWS, Google GCP or MS Azure;
- Basic software development skills;
- Flexibility to travel internationally (whenever necessary);

We welcome your application, even if you do not fulfill all of the requirements listed above.

Why Danube Tech?

- Work in a small, agile team with leading experts for (decentralized) identity technologies;
- Work and manage unique projects with prestigious clients from diverse sectors and industries;
- We will invest heavily in your training and development to make you a leading expert in the field of SSI;
- Pioneer new approaches and standards towards digital identity and develop transformative insights that can shape the industry;
- Engage with our global network of industry leaders;
- Enjoy flexible working hours (incl. home office);
- Benefit from great career opportunities given our growth plans;
- Get the chance to acquire ownership in our company;
- Be part of a company that "is basically building the future of the web" (to quote a developer who joined us this year);

Where?

Vienna, Austria. (*Vienna was awarded "most livable city in the world", every year since 2009.*)
